Re: Lot 58A/Tax Map 22

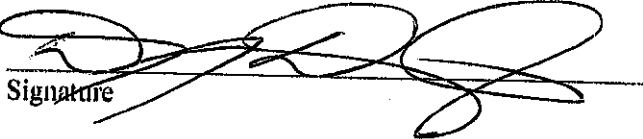

Mr. Daigle,

Plymouth Engineering, Inc. is pleased to be working with Lake Shore Ventures, LLC. on the proposed redevelopment of Lot 58A, located on the corner of Pritham Avenue and Lakeview Street in Greenville, from its current vacant use to the construction of retail and residential space. The construction will consist of a 4,663 square foot, two story building with 3 retail spaces on the first floor and 2 residential spaces and an assembly area on the second floor. The estimated daily sewage is 700 gallons per day per the 2015 Subsurface Wastewater Disposal rules. I have attached a site location plan for ease of locating the project.

If the sanitary district has adequate capacity to handle the sewer demand created by the new development, please sign and date below, and return to our office.

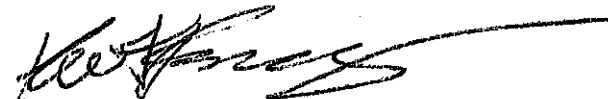

If you have any questions or concerns, please feel free to contact us.

The Signature below provides evidence that the Moosehead Sanitary District has reviewed the proposed project and finds that adequate capacity exists for the additional demand estimated.
